

# Simplicity: the clear choice for wastewater testing

Detection systems and  
services that make  
testing easy

# Simplify testing, save time

U.S. EPA-approved and industry-accepted—over 1,500 systems used in wastewater treatment plants across all 50 states.

Colilert®, Colilert®-18 and Enterolert® are U.S. EPA-approved for the detection of total coliforms, *E. coli* and enterococci in drinking water, surface water, groundwater and wastewater (EPA wastewater Rule 40 CFR Part 136.3).

The U.S. EPA has determined that Colilert-18 meets all of its requirements for measuring fecal coliforms in wastewater.

Colilert, Colilert-18 and Enterolert are included in *Standard Methods for Examination of Water and Wastewater* (9223B and 9230D).

## Unlike traditional methods, IDEXX tests:

- Require little training to perform.
- Have far fewer steps.

## Our team will make your conversion to IDEXX testing easy:

- Regulatory staff are on call to clarify any regional-specific issues.
- Customer and technical service staff are on call to answer any questions.

Colilert-18 in Quanti-Tray/2000

## Easy-to-use, 1–2 minutes of hands-on time

### Fecal Coliforms and *E. coli* Detection

Colilert-18

18 hours

### *E. coli* and Total Coliform Detection

Colilert

24 hours

### Enterococci Detection

Enterolert

24 hours

### Semiautomated quantification reduces hands-on time

Quanti-Tray® and Quanti-Tray®/2000

- Accurate, easy-to-read results based on the *Standard Methods'* Most Probable Number model
- Provides counts from 1 to 2,419 per 100 mL

## Streamline your work with a single source

### Quality Control Testing (QC) and Proficiency Testing (PT)

IDEXX-QC Microbiology  
IDEXX-QC Chemistry

- Everything you need for testing and maintaining accreditation
- Proficiency Testing Services—IDEXX-QC in partnership with NSI Solutions, Inc.

### Chlorine Testing

Free or Total Chlorine

- EPA-accepted DPD reagent (EZ DPD™)
- 5- or 10-mL samples with the press of a button

### Laboratory Essentials

Testing Equipment

The tools you need including waterbaths, incubators and UV lamps

# IDEXX: The clear choice

- Simple, time-saving tests
- Every test meets U.S. EPA requirements
- A single source streamlines your work
- Easy conversion and support
