

Lisa Marie Prieto, P.E., BCEE

Lisa holds a bachelor's degree in engineering from Vanderbilt University. She moved to central Florida shortly after college to work for MPR Engineering on the phase-four expansion of the South Water Reclamation Facility in Orange County. This experience had a profound effect on her and she realized her passion for wastewater and consulting. From there, she spent seven years with CDM Smith, where she was fortunate to work under and learn from some of the best in the business. During that time, she met and married her husband, Ralph Prieto, and had two children, Madelyn and Aiden.

To add variety to her career, she decided to try something new and went to work as a regional sales manager for Carter and VerPlanck. She recently returned to consulting, where she is serving as the office leader and a client service manager for Brown and Caldwell in the Orlando/Maitland office.

Lisa became a member of FWEA shortly after moving to central Florida. She was encouraged by her colleagues at CDM Smith to become active within the industry. Her mentors instilled in her the value of being part of a professional association. She truly enjoyed the activities and became more and more involved. In 2009 she served as the seminars chair, and later on became a director-at-large, and then served as vice president in 2014.

She is also a member of FWPCOA and FSAWWA and serves on the Central Florida Engineers Week Committee. Lisa enjoys spending time gardening, cooking, playing tennis and golf, camping, and spending time with her family. She is a proud resident of Oviedo.
